flexion and extension angle of the wrist and grip strength were 18°, 9°, and 6 kg, respectively. The decrease in RCD was weakly correlated with the decreases in flexion angle of the wrist and grip strength. Conclusions: Anatomical recovery of carpal alignment was not routinely achieved with the use of a single type of plate.

Grip strength measurement for frailty assessment in ...

Grip strength as a stand-alone surrogate measure of frailty among patients with vascular disease, however, has not been extensively described. We hypothesized that grip strength is associated with measures of frailty, comorbidity, and cardiac risk among patients with vascular disease. To test these hypotheses, we measured

PICK1 and ABP/GRIP bind to the AMPA receptor et al, 2001) (AMPA) GluR2 subunit C terminus. Transfer of the Although ABP/GRIP and PICK1 bind the same site on receptor from ABP/GRIP to PICK1, facilitated by GluR2, their interactions with GluR2 can be regulated. GluR2 S880 phosphorylation, may initiate receptor independently by PKC. GluR2

Grip Strength Predicts Cause-Specific Mortality in Middle ...

ICD 8 thor 9), cerebral hemorrhage (CH, 431 by ICD 8th or 9th), and pneumonia (480-487 by ICD 8 or 9th). Pneumonia was chosen because it is one of the major causes of death among elderly persons in Japan. Statistical Analysis Relative risk (RR) of mortality associated with grip strength

Grip strength measurement: Towards a standardized approach ...

The proposed grip strength measurement protocol has been poorly adopted since its publication. Although there seems to be some agreement on cut-off values in non-Asian studies,

Grip and key pinch strength measurements. A digital dynamometer (Takei Scientific Instruments Co, Tokyo, Japan) was used to measure grip strength. We used a pinch gauge (MG-4320NC pinch gauge, B& L Engineering, Santa Ana, CA) to measure key pinch on both dominant and nondominant sides. Grip testing was performed using a standardized
